

# Hi! I'm Lisa of LS Codes

I specialize in helping people, just like you, create websites they love.

## You want a website. I can help with that!

I love creating websites that truly express your vision. Need a WordPress site that you can amend at your whim? A lightning-fast page coded with HTML & CSS? Training? Or just a bit of assistance updating your site? I can help.

*Lisa Savoie constructed our non-profit's website, managed the launch, and provided documentation/training to ensure that my staff is equipped to maintain the website long-term. Throughout this process, Lisa exceeded our expectations. She is knowledgeable, yet also capable of communicating clearly with non-technical staff. She works efficiently; this project was completed well ahead of our anticipated launch date. She communicates clearly and regularly. Importantly, her work product is extremely high quality. But, perhaps even more importantly, the process itself was seamless and dare I say it... enjoyable!*

— Heather Finnegan, Director, TCF

## Services

### Custom Websites

Let's make a website you love and that captures your vision of your business. Custom designed to help you meet your business goals. Easy for you to update your

### Tech Support

Someone in your corner to help with the rough spots, answer questions, and teach you how to make the most of your site. I can also save you precious time

meet your business goals. Easy for you to update your content, blog posts, and galleries.

most of your site. I can also save you precious time updating plugins and making sure the details are right.

## Solutions

You're considering hiring a developer. Which means you're looking for solutions.

### A fresh start

The Clock Tower Bakery's site didn't reflect their business. A redesign brought their website in line with their brand.

### eCommerce

Building your store from scratch is a huge project. I can help you decide on the right platform. For clothology:135 the answer was Shopify.

### Training

TCF needed a site that they could update easily. After training, they have been able to add to their site as their foundation grows.

### Improve your site

City Cycles' customers had a tough time navigating their site. Improvements to their UX design were needed.

### Be seen

bru coffee shop needed a landing page to alert customers of its grand opening. But first, we worked to define their brand.

### Fundraising

It's a Racquet raises money for mental health charities. Having a website made them more appealing to donors.

*John & I wanted to give an extra special thank you for all your hard work, time, diligence & mostly, patience in working with us! You were beyond amazing to work with! Your attention to detail is incredible & that was exactly what we needed.*

— Pam Burton, owner, clothology:135

Let's Get Started!

Thanks for attending the  
WordPress Meetup to learn more  
about Gutenberg Blocks 😊
